

YEAR-END OFFER | IN STOCK READY TO SHIP

CS-80. No Lead Time. Built for Larger Parts.

Most welding cells are built around one part size, so a mixed product line means compromises or a second system. The CS-80 adapts to the job instead: run one long weldment across the full work zone, or split it into two stations so operators keep loading while the robot welds. It ships pre-installed electrically and mechanically, so you can get up and running quickly.

AT A GLANCE

- **Built for larger parts:** headstock/tailstock positioner handles parts up to 2,200 lbs and 63 in diameter.
- **Maximized efficiency:** operators unload one station while the robot welds at the other.
- **Built for part variety:** run one long weldment across the full work zone or two shorter parts at separate stations, without reconfiguring the system.
- **Consistent, high-quality welds:** clean, repeatable results every time.
- **Greater part coverage:** the robot travels the full length of the work zone on a floor-mounted track.
- **German engineered. American built.**

WHY NOW

- In stock and ready for immediate shipment
- Get installed and running quickly
- May qualify for Section 179 - equipment placed in service by December 31, 2026 can be eligible for full first-year deduction

PRODUCT SPECIFICATIONS

SYSTEM INCLUDES

- > QRC-350 Welding Robot
- > Pulse Pro 451 Power Supply
- > Rotating Headstock/Tailstock
- > Torch Cleaning Package
- > Seam Tracking
- > Touch Sensing

OPTIONS AVAILABLE

- > iCSE Offline Laser Sensor
- > RoboPlan Offline Programming
- > CLOOS Cares Service Program
- > Fume Extraction Options
- > C-Gate Cloud Based DMS

MAXIMUM PART SIZE

Weight	2,200 lbs	998 kg
Length	197 in	5,000 mm
Diameter	63 in	1,600 mm

CUSTOMER PROVIDES

- Power Requirements: 480V 3 PH
- Compressed Air: 90 PSI
- Shielding Gas

*Offer ends December 31, 2026
